

Teer Quarry Climbing

By Andre Chiquito
Unless otherwise noted all FAs done on top rope

O: Access Trail

O: Top Rope Setup

1: Parking (1006 Communications Dr, Durham, NC 27704)

2. COVID Corner

3. The Ledge (Rap in, no bottom access)

4. The Medallion (Rap in, no bottom access)

COVID Corner

You can gain anchor by using a rope hanging from a tree where the pink trail diverges from the red on the map. Alternatively you can bush whack from the red trail where it passes above COVID Corner.

1. Quarrytine - 5.7 - FA Phil Hooper

Start by matching the crimp rail up and to the right of the low shelf. Variations include only using the left crack or right crack.

2. Flatten Your Curves - 5.9 - FA Andre Chiquito

Start by matching the small shelf. Resist the temptation to use the crack to the right!

3. Takeout Only - 5.5 - FA Andre Chiquito

The Ledge

Use straps and static material to sling a boulder for an anchor, can be backed up by another boulder. Use a couple medium trees to anchor 3. Anchors denoted by an X.

1. Goose Egg - 5.10 - FA Andre Chiquito

Start standing on the ledge to the left of the pillar with the tree. Don't use the pillar or any features directly above it

2. Gone, Baby, Gone - 5.9 - FA Andre Chiquito

Same start as Goose Egg but the pillar and all features above it are on

3. Learn The Hard Way - 5.10 - FA Andre Chiquito

Start directly under the anchor, follow the meandering moves finish just to the right of the chossy bulge

The Medallion

Use a large pine tree ~15 feet from the edge for the anchor with a smaller evergreen near the top of the climb for a directional and/or primary anchor.

1. The Medallion - 5.10 - FA Andre Chiquito

Start on the highest of the obvious ledge steps, follow the easier slanting crack to a finish with a splitter finger crack
